研究背景 (Background)

This gene encodes an integral membrane glycoprotein that is a member of the mucin family. Mucins are O-glycosylated

产品名称: MUC12 Mouse Monoclonal Antibody

proteins that play an essential role in forming protective mucous barriers on epithelial surfaces and have been implicated in epithelial renewal and differentiation. These glycoproteins also play a role in intracellular signaling. This protein is expressed on the apical membrane surface of epithelial cells that line the mucosal surfaces of many different tissues including the colon, pancreas, prostate, and uterus. The expression of this gene is downregulated in colorectal cancer tissue.
