研究背景 (Background)

Plays a role in regulating expression or stability of the mitochondrial uncoupling proteins SLC25A14 and SLC25A27 in dopaminergic neurons of the substantia nigra pars compacta and attenuates the oxidative stress induced by calcium entry into the neurons via L-type channels during pacemaking. It cooperates with Ras to increase cell transformation, it positively

regulates transcription of the androgen receptor, and it may function as an indicator of oxidative stress.

研究领域 (Research Area)
