

产品货号: APRab05119

#### 产品概述 (Summary)

产品名称 (Production Name) NMDAζ1 (phospho Ser897) Rabbit Polyclonal Antibody

描述 (Description) Rabbit polyclonal Antibody

宿主 (Host) Rabbit

应用 (Application) WB,IHC,ICC/IF,ELISA 种属反应性 (Reactivity) Human, Mouse, Rat

#### 产品性能 (Performance)

Unconjugated 偶联物 (Conjugation) 修饰 (Modification) Phosphorylated

同种型 (Isotype) IgG

Polyclonal 克隆 (Clonality) 形式 (Form) Liquid

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid 存放说明 (Storage)

freeze/thaw cycles.

Liquid in PBS containing 50% glycerol, 0.5% protective protein and 0.02% 储存溶液 (Buffer)

New type preservative N.

纯化方式 (Purification) Affinity purification

## 免疫原信息 (Immunogen)

基因名 (Gene Name) GRIN1

GRIN1; NMDAR1; Glutamate [NMDA] receptor subunit zeta-1; N-methyl-D-别名 (Alternative Names)

aspartate receptor subunit NR1; NMD-R1

基因 ID (Gene ID) 2902.0

Q05586.The antiserum was produced against synthesized peptide derived

蛋白 ID (SwissProt ID) from human NMDAR1 around the phosphorylation site of Ser897. AA

range:864-913

# 产品应用 (Application)

稀释比 (Dilution Ratio) WB 1:500-1:2000,IHC 1:100-1:300,ICC/IF 1:50-1:200,ELISA 1:5000-1:20000

**Antibody** 

产品货号: APRab05119

蛋白分子量 (Molecular Weight) 120kDa

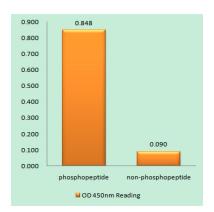

#### 研究背景 (Background)

The protein encoded by this gene is a critical subunit of N-methyl-D-aspartate receptors, members of the glutamate receptor channel superfamily which are heteromeric protein complexes with multiple subunits arranged to form a ligandgated ion channel. These subunits play a key role in the plasticity of synapses, which is believed to underlie memory and learning. Cell-specific factors are thought to control expression of different isoforms, possibly contributing to the functional diversity of the subunits. Alternatively spliced transcript variants have been described. [provided by RefSeq, Jul 2008], function: NMDA receptor subtype of glutamate-gated ion channels with high calcium permeability and voltagedependent sensitivity to magnesium. Mediated by glycine. This protein plays a key role in synaptic plasticity, synaptogenesis, excitotoxicity, memory acquisition and learning. It mediates neuronal functions in glutamate neurotransmission. Is involved in the cell surface targeting of NMDA receptors, online information: NMDA receptor entry,PTM:NMDA is probably regulated by C-terminal phosphorylation of an isoform of NR1 by PKC. Dephosphorylated on Ser-897 probably by protein phosphatase 2A (PPP2CB). Its phosphorylated state is influenced by the formation of the NMDAR-PPP2CB complex and the NMDAR channel activity, similarity: Belongs to the glutamate-gated ion channel (TC 1.A.10) family,,subcellular location:Enriched in post-synaptic plasma membrane and post-synaptic densities.,subunit:Forms heteromeric channel of a zeta subunit (GRIN1), a epsilon subunit (GRIN2A, GRIN2B, GRIN2C or GRIN2D) and a third subunit (GRIN3A or GRIN3B); disulfide-linked. Found in a complex with GRIN2A or GRIN2B, GRIN3A or GRIN3B and PPP2CB. Interacts with DLG4 and MPDZ.,

#### 研究领域(Research Area)

Calcium; Neuroactive ligand-receptor interaction; Long-term potentiation; Alzheimer's disease; Amyotrophic lateral sclerosis (ALS); Huntington's disease;

## 图片 (Image Data)

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-Phosphopeptide (Phospho-right), using NMDAR1 (Phospho-Ser897) Antibody
