

产品名称: RyR-2 (phospho Ser2808) Rabbit Polyclonal Antibody
产品货号: APRab05399

产品概述 (Summary)

产品名称 (Production Name)	RyR-2 (phospho Ser2808) Rabbit Polyclonal Antibody
描述 (Description)	Rabbit polyclonal Antibody
宿主 (Host)	Rabbit
应用 (Application)	IHC, ICC, IF, ELISA
种属反应性 (Reactivity)	Human, Mouse, Rat

产品性能 (Performance)

偶联物 (Conjugation)	Unconjugated
修饰 (Modification)	Phosphorylated
同种型 (Isotype)	IgG
克隆 (Clonality)	Polyclonal
形式 (Form)	Liquid
存放说明 (Storage)	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
储存溶液 (Buffer)	Liquid in PBS containing 50% glycerol, 0.5% protective protein and 0.02% New type preservative N.
纯化方式 (Purification)	Affinity purification

免疫原信息 (Immunogen)

基因名 (Gene Name)	RYR2
别名 (Alternative Names)	RYR2; Ryanodine receptor 2; RYR-2; RyR2; hRYR-2; Cardiac muscle ryanodine receptor; Cardiac muscle ryanodine receptor-calcium release channel; Type 2 ryanodine receptor
基因 ID (Gene ID)	6262.0
蛋白 ID (SwissProt ID)	Q92736. The antiserum was produced against synthesized peptide derived from human RyR2 around the phosphorylation site of Ser2808. AA range: 2774-2823

产品应用 (Application)

产品名称: RyR-2 (phospho Ser2808) Rabbit Polyclonal Antibody
产品货号: APRab05399

稀释比 (Dilution Ratio)

IHC 1:100-1:300, ICC/IF 1:50-1:200, ELISA 1:5000-1:20000

蛋白分子量 (Molecular Weight)

研究背景 (Background)

This gene encodes a ryanodine receptor found in cardiac muscle sarcoplasmic reticulum. The encoded protein is one of the components of a calcium channel, composed of a tetramer of the ryanodine receptor proteins and a tetramer of FK506 binding protein 1B proteins, that supplies calcium to cardiac muscle. Mutations in this gene are associated with stress-induced polymorphic ventricular tachycardia and arrhythmogenic right ventricular dysplasia. [provided by RefSeq, Jul 2008], developmental stage: Expressed in myometrium during pregnancy., disease: Defects in RYR2 are the cause of catecholaminergic polymorphic ventricular tachycardia type 1 (CPVT1) [MIM:604772]; also known as stress-induced polymorphic ventricular tachycardia (VTSIP). CPVT1 is an autosomal dominant form of arrhythmogenic disorder characterized by stress-induced, bidirectional ventricular tachycardia that may degenerate into cardiac arrest and cause sudden death., disease: Defects in RYR2 are the cause of familial arrhythmogenic right ventricular dysplasia 2 (ARVD2) [MIM:600996]; also known as arrhythmogenic right ventricular cardiomyopathy 2 (ARVC2). ARVD is an autosomal dominant disease characterized by partial degeneration of the myocardium of the right ventricle, electrical instability, and sudden death. It is clinically defined by electrocardiographic and angiographic criteria; pathologic findings, replacement of ventricular myocardium with fatty and fibrous elements, preferentially involve the right ventricular free wall., function: Communication between transverse-tubules and sarcoplasmic reticulum. Contraction of cardiac muscle is triggered by release of calcium ions from SR following depolarization of T-tubules., induction: By TGF-beta., miscellaneous: Ryanodine is an alkaloid that binds to the Ca-release channel in junctional SR and modulates its activity., miscellaneous: The calcium release channel activity resides in the C-terminal region while the remaining part of the protein constitutes the 'foot' structure spanning the junctional gap between the SR and the T-tubule. It is possible that the foot structure interacts with the cytoplasmic region of the dihydropyridine receptor., miscellaneous: The calcium release channel is modulated by calcium ions, magnesium ions, ATP and calmodulin., online information: Ryanodine receptor entry, online information: RYR2 entry, similarity: Belongs to the ryanodine receptor family., similarity: Contains 2 EF-hand domains., similarity: Contains 3 B30.2/SPRY domains., similarity: Contains 5 MIR domains., subunit: Homotetramer., tissue specificity: Heart muscle, brain (cerebellum and hippocampus) and placenta.,

研究领域 (Research Area)

Calcium; Cardiac muscle contraction; Hypertrophic cardiomyopathy (HCM); Arrhythmogenic right ventricular cardiomyopathy (ARVC); Dilated cardiomyopathy;
