研究背景 (Background)

This gene encodes a protein that interacts with thyroid hormone receptors, also known as hormone-dependent transcription factors. The gene product interacts specifically with the ligand binding domain. This gene is one of several that may play a role in early-stage non-small cell lung cancer. [provided by RefSeq, Oct 2009],similarity:Belongs to the AAA ATPase family.,subunit:Specifically interacts with the ligand binding domain of the thyroid receptor (TR). This interaction does not require the presence of thyroid hormone for its interaction. Interacts with HPV16 E1.,

研究领域 (Research Area)

Neuroscience; Endocrine system; Thyroid axis

注意事项 (Note)

For research use only.
