

**产品名称:** Phospho-CBL (Ser669) Rabbit Monoclonal Antibody

**产品货号:** AMRe01770

### 产品概述 (Summary)

|                   |                                                                                                      |
|-------------------|------------------------------------------------------------------------------------------------------|
| 描述(Description)   | Recombinant rabbit monoclonal antibody                                                               |
| 宿主(Host)          | Rabbit                                                                                               |
| 应用(Application)   | WB                                                                                                   |
| 种属反应(Reactivity)  | Human                                                                                                |
| 偶联物(Conjugation)  | Unconjugated                                                                                         |
| 修饰(Modification)  | Phosphorylated                                                                                       |
| 同种型(Isotype)      | IgG                                                                                                  |
| 克隆(Clonality)     | Monoclonal                                                                                           |
| 剂型(Form)          | Liquid                                                                                               |
| 保存条件(Storage)     | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.             |
| 储存溶液(Buffer)      | 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% protective protein |
| 纯化 (Purification) | Affinity Purification                                                                                |

### 产品应用(Application)

|                       |                                              |
|-----------------------|----------------------------------------------|
| 稀释比(Dilution Ratio)   | WB 1:500-1:1000                              |
| 分子量(Molecular Weight) | Calculated MW: 100 kDa; Observed MW: 120 kDa |

### 抗原信息(Antigen Information)

|                       |                                                                                                                                                                             |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 基因名(Gene Name)        | CBL                                                                                                                                                                         |
| 别名(Alternative Names) | CBL; CBL2; RNF55; E3 ubiquitin-protein ligase CBL; Casitas B-lineage lymphoma proto-oncogene; Proto-oncogene c-Cbl; RING finger protein 55; Signal transduction protein CBL |
| 基因 ID(Gene ID)        | 867                                                                                                                                                                         |
| SwissProt ID          | P22681                                                                                                                                                                      |
| 免疫原(Immunogen)        | A synthetic Phosphorylated peptide corresponding to residues target protein                                                                                                 |

### 研究背景 (Background)

This gene is a proto-oncogene that encodes a RING finger E3 ubiquitin ligase. The encoded protein is one of the enzymes required for targeting substrates for degradation by the proteasome. This protein mediates the transfer of ubiquitin from

ubiquitin conjugating enzymes (E2) to specific substrates. This protein also contains an N-terminal phosphotyrosine binding domain that allows it to interact with numerous tyrosine-phosphorylated substrates and target them for proteasome degradation. As such it functions as a negative regulator of many signal transduction pathways. This gene has been found to be mutated or translocated in many cancers including acute myeloid leukaemia. Mutations in this gene are also the cause of Noonan syndrome-like disorder

### 研究领域 (Research Area)

Cell Biology

### 注意事项 (Note)

For research use only.

### 图片 (Image Data)

Western blot analysis of Phospho-CBL (Ser669) in K562 lysates using Phospho-CBL (Ser669) antibody.
