研究背景 (Background)

产品名称: Phospho-Histone H2A.X (Ser139) Rabbit Monoclonal Antibody
产品货号: AMRe03773

Variant histone H2A which replaces conventional H2A in a subset of nucleosomes. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability.
