研究背景 (Background)

Thiol protease. Key protease responsible for the removal of the invariant chain from MHC class II molecules. The bond-specificity of this proteinase is in part similar to the specificities of cathepsin L and cathepsin N. Thiol protease. Key protease responsible for the removal of the invariant chain from MHC class II molecules and MHC class II antigen presentation

(PubMed:30612035). The bond-specificity of this proteinase is in part similar to the specificities of cathepsin L.
