

**产品名称: Dnmt3b (1S2) Rabbit Monoclonal Antibody**

**产品货号: AMRe10091**

### 产品概述 (Summary)

|                   |                                                                                                                                                                                       |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 描述(Description)   | Recombinant rabbit monoclonal antibody                                                                                                                                                |
| 宿主(Host)          | Rabbit                                                                                                                                                                                |
| 应用(Application)   | WB, ICC/IF                                                                                                                                                                            |
| 种属反应(Reactivity)  | Human, Mouse, Rat                                                                                                                                                                     |
| 偶联物(Conjugation)  | Unconjugated                                                                                                                                                                          |
| 修饰(Modification)  | Unmodified                                                                                                                                                                            |
| 同种型(Isotype)      | IgG                                                                                                                                                                                   |
| 克隆(Clonality)     | Monoclonal                                                                                                                                                                            |
| 剂型(Form)          | Liquid                                                                                                                                                                                |
| 保存条件(Storage)     | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.<br>Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% New type preservative |
| 储存溶液(Buffer)      | N and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.                                                                                    |
| 纯化 (Purification) | Affinity purification                                                                                                                                                                 |

### 产品应用(Application)

|                       |                                    |
|-----------------------|------------------------------------|
| 稀释比(Dilution Ratio)   | WB 1:1000-1:2000, ICC/IF 1:20-1:50 |
| 分子量(Molecular Weight) | 96kDa                              |

### 抗原信息(Antigen Information)

|                       |                                                |
|-----------------------|------------------------------------------------|
| 基因名(Gene Name)        | DNMT3B                                         |
| 别名(Alternative Names) | Dnmt3b; DNA methyltransferase HsallIB; DNMT3B; |
| 基因 ID(Gene ID)        | 1789.0                                         |
| SwissProt ID          | Q9UBC3                                         |
| 免疫原(Immunogen)        | A synthetic peptide of human Dnmt3b            |

### 研究背景 (Background)

Required for genome wide de novo methylation and is essential for the establishment of DNA methylation patterns during development. DNA methylation is coordinated with methylation of histones. May preferentially methylates nucleosomal DNA

within the nucleosome core region. May function as transcriptional co-repressor by associating with CBX4 and independently of DNA methylation. Seems to be involved in gene silencing (By similarity). Required for genome-wide de novo methylation and is essential for the establishment of DNA methylation patterns during development. DNA methylation is coordinated with methylation of histones. May preferentially methylates nucleosomal DNA within the nucleosome core region. May function as transcriptional co-repressor by associating with CBX4 and independently of DNA methylation. Seems to be involved in gene silencing (By similarity). In association with DNMT1 and via the recruitment of CTCFL/BORIS, involved in activation of BAG1 gene expression by modulating dimethylation of promoter histone H3 at H3K4 and H3K9. Isoforms 4 and 5 are probably not functional due to the deletion of two conserved methyltransferase motifs. Functions as a transcriptional corepressor by associating with ZHX1. Required for DUX4 silencing in somatic cells (PubMed:27153398).

### 研究领域 (Research Area)

Cysteine and methionine metabolism;

### 注意事项 (Note)

For research use only.

### 图片 (Image Data)

Western blot analysis of Dnmt3b expression in (1) A549 cell lysate; (2) A431 cell lysate.
