

**产品名称: IL11RA (8A4) Rabbit Monoclonal Antibody**

**产品货号: AMRe12488**

### 产品概述 (Summary)

|                   |                                                                                                                             |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 描述(Description)   | Recombinant rabbit monoclonal antibody                                                                                      |
| 宿主(Host)          | Rabbit                                                                                                                      |
| 应用(Application)   | WB,IHC,ICC/IF,FC                                                                                                            |
| 种属反应(Reactivity)  | Human,Mouse                                                                                                                 |
| 偶联物(Conjugation)  | Unconjugated                                                                                                                |
| 修饰(Modification)  | Unmodified                                                                                                                  |
| 同种型(Isotype)      | IgG                                                                                                                         |
| 克隆(Clonality)     | Monoclonal                                                                                                                  |
| 剂型(Form)          | Liquid                                                                                                                      |
| 保存条件(Storage)     | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.                                    |
| 储存溶液(Buffer)      | Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% New type preservative N and 0.05% protective protein. |
| 纯化 (Purification) | Affinity purification                                                                                                       |

### 产品应用(Application)

|                       |                                                                   |
|-----------------------|-------------------------------------------------------------------|
| 稀释比(Dilution Ratio)   | WB 1:1000-1:5000,IHC 1:100-1:200,ICC/IF 1:100-1:200,FC 1:50-1:100 |
| 分子量(Molecular Weight) | 45kDa                                                             |

### 抗原信息(Antigen Information)

|                       |                                                                                                                                        |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| 基因名(Gene Name)        | IL11RA                                                                                                                                 |
| 别名(Alternative Names) | CRSDA; IL-11 receptor subunit alpha; IL-11R subunit alpha; IL11RA; Interleukin 11 receptor alpha; Interleukin 11 receptor alpha chain; |
| 基因 ID(Gene ID)        | 3590.0                                                                                                                                 |
| SwissProt ID          | Q14626                                                                                                                                 |
| 免疫原(Immunogen)        | A synthetic peptide of human IL11RA                                                                                                    |

### 研究背景 (Background)

Receptor for interleukin-11. The receptor systems for IL6, LIF, OSM, CNTF, IL11 and CT1 can utilize IL6ST for initiating signal transmission. The IL11/IL11RA/IL6ST complex may be involved in the control of proliferation and/or differentiation of

skeletogenic progenitor or other mesenchymal cells. Receptor for interleukin-11 (IL11). The receptor systems for IL6, LIF, OSM, CNTF, IL11 and CT1 can utilize IL6ST for initiating signal transmission. The IL11/IL11RA/IL6ST complex may be involved in the control of proliferation and/or differentiation of skeletogenic progenitor or other mesenchymal cells (Probable). Essential for the normal development of craniofacial bones and teeth. Restricts suture fusion and tooth number.

### 研究领域 (Research Area)

Cytokine-cytokine receptor interaction; Jak\_STAT; Hematopoietic cell lineage;

### 注意事项 (Note)

For research use only.

### 图片 (Image Data)

Western blot detection of IL-11RA in K562 cell lysates using IL-11RA antibody(1:1000 diluted).
