研究背景 (Background)

Transcription factor with important functions in the development of the eye, nose, central nervous system and pancreas.

产品名称: PAX6 (19K6) Rabbit Monoclonal Antibody
产品货号: AMRe15791

Required for the differentiation of pancreatic islet alpha cells (By similarity). Competes with PAX4 in binding to a common element in the glucagon, insulin and somatostatin promoters. Regulates specification of the ventral neuron subtypes by establishing the correct progenitor domains (By similarity).
