研究背景 (Background)

Cell localization:Membrane, Cytoplasm.This gene encodes a type-I integral membrane glycoprotein with diverse distribution in human tissues. The physiological function of this protein may be related to its mucin-type character. The homologous protein in other species has been described as a differentiation antigen and influenza-virus receptor. The specific function of this protein has not been determined but it has been proposed as a marker of lung injury. Alternatively spliced transcript variants

encoding different isoforms have been identified. [provided by RefSeq, Jul 2008],

图片 (Image Data)

Mouse brain cell lysates were separated by 4-20% SDS-PAGE, and the membrane was blotted with Podoplanin Rabbit Monoclonal Antibody 1:1000. The HRP-conjugated Goat anti-Rabbit IgG(H + L) antibody was used to detect the antibody.
