Product Name: Recombinant Human TAFA4 (N-6His)

Catalog #: PEH0620

概述 (Summary)

英文全称 FAM19A4/TAFA4

纯度 (Purity) Greater than 95% as determined by reducing SDS-PAGE

内毒素 (Endotoxin level) <1 EU/μg as determined by LAL test.

蛋白构建 (Construction) Recombinant Human Family with Sequence Similarity 19, Member A4 is

produced by our E.coli expression system and the target gene encoding

Ser35-Arg140 is expressed with a 6His tag at the N-terminus.

Accession # Q96LR4

蛋白标签 (Tag)

表达宿主 (Host)E.coli种属 (Species)Human预测分子量 (Predicted MW)14.1 KDa

蛋白形态 (Form) Lyophilized from a 0.2 µm filtered solution of 20mM HAc-NaAc, 150mM NaCl,

pH 4.5.

储存缓冲液 (Buffer)

运输方式 (Shipping) The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

稳定性&储存 (Stability &Storage) Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

复溶 (Reconstitution) Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It

Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to

is not recommended to reconstitute to a concentration less than 100µg/ml.

reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize

freeze-thaw cycles.

背景 (Background)

分子别名 (Alternative Names)

背景介绍 (References)

Protein FAM19A4; Chemokine-like protein TAFA-4; TAFA4; family with sequence similarity 19 (chemokine (C-C motif)-like); member A4; FAM19A4; chemokine-like protein TAFA-4

FAM19A4 is a secreted, 12 kDa member of the FAM19/TAFA family of chemokine-like proteins. Like other members of the FAM19/TAFA family, with the exception of TAFA5, mature FAM19A4 contains 10 regularly spaced cysteine residues. The FAM19A4 proteins are predominantly expressed in specific regions of the brain and the biological functions of FAM19A4 family members remain to be determined, but there are a few tentative hypotheses. First, FAM19A4 may modulate immune responses in the CNS by functioning as brain specific chemokines, and may act with other chemokines to optimize the recruitment and activity of immune cells in the CNS. Second, FAM19A4 may represent a novel class of neurokines that act as regulators of immune nervous cells. And third, FAM19A4 may control axonal sprouting following brain injury.

注意事项 (Note)

For Research Use Only, Not for Diagnostic Use.
